

13th January 2026

**Subject: Virtual work experience opportunity**

Dear Parents and Carers,

At AstraZeneca it is recognised that access to many different work experiences is important for students to gain valuable insights into different industries and to help them with their professional and personal development.

AstraZeneca will be hosting virtual work experience for Year 10 students during February half term- w/c 16th February. This will be a virtual opportunity over the course of a week. Showcasing the different functions involved in the development of a medicine, raising awareness of different vocations. The sessions will be hosted each morning and will involve bitesize, interactive presentations, followed by completion of a small project.

Registrations for AstraZeneca's Virtual Work Experience for 2026 are open.

Students are able to join us for a week of workshops about the process behind making a medicine and test skills and knowledge on a daily basis.

Please see below for an overview of the week and the registration link.

We would be grateful if you could kindly share your participation in the virtual activity for us to ensure we have accurate records of activities students have taken part in.

Yours sincerely,

Miss C Griffiths  
Careers Coordinator
