

Task Sheet

Task 1: Write any ideas you can think of around the mind map:

What would stop a person being able to give their consent?

Task 2:

True or False?

A person can say yes to sex and mean it when they are drunk	True or False
It is important to only have sex if a person is able to clearly say yes or no.	True or False
These people should tell somebody if they think Alex may be upset.	True or False

- Responsibility for ensuring consent has been given lies with the person seeking consent, both ethically and in law.
- It is not consent if the other person is not actively consenting, does not have the capacity to consent (e.g. not old enough, impaired judgement due to alcohol etc.) or is being manipulated, exploited or coerced.

Task 3: Consent scenarios. Discuss each case study and fill in the table

	Has the victim given consent? Why/why not?	What are the possible consequences for the victim	What should they do next?
